

Sheltering in Place

Hello, friends --

You are surely following the national and local news about COVID-19 where you live.

In Florida, state, county and our town's regulations are getting stricter by the day as officials aim to protect individual and public safety.

- Florida's governor has banned short-term vacation rentals and imposed border checkpoints and a 14-day quarantine for the growing list of "hot spots".
- Lee County has closed access to its beaches, parks and public facilities.
- The Town declared a state of emergency, and some resorts and timeshares have already closed down.

Our Board of Directors unanimously sends the following message:

STAY HOME in your own state!

This is the best way to take care of yourselves, your loved ones, and our staff and community.

Marina Village is open for now while we deep clean and sanitize all of the units as well as to perform repairs and maintenance. This work is being done by Laurie, Lisa, Taki and Matt, NOT by our regular cleaning contractor.

If you are interested in following the local goings-on, the Fort Myers News Press - [Website](#) -- has recently expanded its coverage of The Beach and you can sign up for a free, daily email recap of their headlines.

On behalf of the Board of Directors and our Management staff, we appreciate your support and understanding while the Coronavirus Pandemic is brought under control.

Sincerely,

-- Paul Rosen
